

TGK-3 Tree Guying Kit up to 3" in caliper

130083-1

Diadem TGK-3 guying system replaces lodge poles with triangular frames secured by stainless steel anchors.

KEY FEATURES

- Simple installation
- No need to penetrate roof insulation or membrane
- No "thermal bridging" will develop

APPLICATION

Can be used to stabilize up to 3" caliper trees on any rooftops to a maximum slope of 5%, or on flat roofs which can hold the required ballast. Growing medium or other material can be used as a ballast as needed, with a minimum weight of 16.5 lbs/sqf.

SPECIFICATION

TECHNICAL DATA

Thickness of Plate: (inch)	3/8"
Post diameter: (inch)	1/2"
Fastening Ring Matl.:	Stainless Steel
Damping plate material:	Recycled plastic
Mat water permeability: (lxm²xs)	105
Anchor post material:	Stainless steel
Locking Head Material:	Stainless Steel
Tensile strength warp: (kp / ft)	477
Tensile strength weft: (kp / ft)	477
Locking Head Diameter: (inch)	1"
